Please reject the NAB's petition 04-160. I fully support the XM Satellite. I enjoy being able to turn on my radio and know I am going to get to listen to music and the talk shows. A lot of the talk shows are obscene and my personal opinion is not appropriate. There are so many young listeners out there and that is what they are subject to listen to. Even as an adult I do not want to hear that. I pay for XM Satellite and am very happy with it. Again please reject this petition.
